eTwinning Project: Creating Open Educational Resources for Inclusive Digital Healthcare

Between March and June 2025, students from Turkey, Slovakia, and Croatia collaborated on the eTwinning project "Creating Open Educational Resources for Inclusive Digital Healthcare," part of the Erasmus+ INVITE initiative. The project aimed to raise awareness about inclusive digital healthcare and enhance students' digital competencies, focusing on the needs of elderly and disadvantaged individuals.

Turkish students produced a two-part podcast on the challenges seniors face using digital health apps. Slovak students created a video and activity introducing Continuous Glucose Monitoring (CGM) systems, while Croatian students developed a video promoting empathy toward older and disadvantaged groups.

Together, participants also contributed to an open educational resource for health vocational schools, including a digital dictionary and an educational game to reinforce key vocabulary.

Steering committee meetings

The INVITE project is making steady progress thanks to regular steering committee meetings. In these meetings, the team reviews updates, discusses any challenges, and makes important decisions. By working together and staying on the same page, the project is moving forward and reaching its key goals on time.

First project conference

The HealthTech Adria Conference 2025, held on October 2–3 at the University of Split's School of Medicine, brought together over 300 participants from Croatia, the Adriatic region, and across Europe. Organized by NetHub in partnership with the University of Split, the event showcased advances in digital health and fostered collaboration among healthcare professionals, technologists, and innovators.

A featured session organized by IPEMED highlighted educational and innovation initiatives in healthcare, including the INVITE project, which promotes learning, mentorship, and ecosystem development.

First project conference

A highlight panel, "Gathering for Impact: How Health Innovation Ecosystems Learn, Grow and Scale Together," underscored that sustainable growth in health innovation relies not only on technology but also on education, capacity building, and shared learning.
